ZTERS Inc. Announces Employee Anniversary: ZTERS Celebrates Ten Years with Employees

HOUSTON, TX- ZTERS, a waste services company, announced that they have recently celebrated Jamie Fields and Nichole Thornton's 10-year anniversaries with the company.

Fields and Thornton are both Senior Account Managers. Ten years ago, Fields was the eighth salesperson hired at ZTERS. The company has now grown to over 200 employees. "Helping the company grow and watching the continuous change and improvement has been amazing. We are continuously striving to push through adversities and make the workplace a better environment!" said Fields.

"She strives every year to do better than she did the year before, and she has proven over and over again that she is 1000% capable of doing whatever she sets her mind to," said Tiffany Hodde, Division Manager.

Thornton contributed almost 6% of ZTERS' overall revenue for 2021, and she is about to complete her seventh year as a Sales Leader. About her success at ZTERS, Thornton says, "I was able to take what I was already good at, talking to people, and develop a skill set to make the most out of it. It's amazing, not only that ZTERS has helped me grow as a person, but to watch the growth within the company."

"She brings spark to all her customer interactions, and truly understands how to connect with people and build long-lasting, deep relationships with her customers and with the folks around her," said Hodde.

Both Fields and Thornton continue to enjoy their time at ZTERS. "We are incredibly excited for them to hit this 10-year milestone with ZTERS and look forward to what another 10 years brings!" Hodde continued. "This was supposed to be an in-between job, but I found my home at ZTERS," said Thornton. Fields states, "ZTERS is where it's at!"

About ZTERS

ZTERS is a family-owned business founded in 2009 on the principle that site service rentals can be fair, simple and reliable. The company combines best-in-class customer service and honest relationships with local partners to help construction companies, project managers and event producers find commercial waste services across the United States.
